# RUBBERS

FOR THE CHAMPION  
IN YOU

## RHYZM-TECH

Another chapter in the success story of the popular Rhyzm rubber is written by the JOOLA Rhyzm-Tech. Due to modifications of the sponge, which has again been designed with considerably larger pores, a real catapult machine has been developed. The JOOLA Rhyzm-Tech is a rubber that supports any rotation input in all situations and therefore gives all active topspin players an extra boost. The JOOLA Rhyzm-Tech is a challenge to overcome. Once this is managed, you can reach a new, significantly higher level.

<b>COLORS</b> [Red/Black]	<b>PIMPLES</b> IN	<b>SPONGE</b> 1.8/2.0/max	<b>HARDNESS</b> 42.5°	<b>STRATEGY</b> ALL - OFF ex	<b>SPEED</b> FAST EXTREME	<b>SPIN</b> EXTRA HIGH	<b>Geo-Grip POWER</b>	<b>Geo-Sponge POWER</b>
------------------------------	----------------------	------------------------------	--------------------------	---------------------------------	------------------------------	---------------------------	-----------------------	-------------------------

## RHYZM-P

RHYZM - on the market for 5 years and already almost a classic! The focus fell on development and improvement of the sponge up until now, whereas here a much improved rubber surface has been precisely worked upon. This has led to the rubber having substantially more grip, with which not only more spin can be generated, but also better control and the durability is improved. Ideal also for use with the new Poly-ball.

<b>COLORS</b> [Red/Black]	<b>PIMPLES</b> IN	<b>SPONGE</b> 1.8/2.0/max	<b>HARDNESS</b> 45°	<b>STRATEGY</b> ALL - OFF ex	<b>SPEED</b> EXTREME	<b>SPIN</b> EXTRA HIGH	<b>Geo-Grip POWER</b>
------------------------------	----------------------	------------------------------	------------------------	---------------------------------	-------------------------	---------------------------	-----------------------

# TEST OF THE RHYZM-FAMILY

The different results of our rubber test regarding trajectory, spin and speed are not considered to be an assessment. They are only an approach to illustrate the small and subtle differences. Playing systems are customized; therefore every player

needs a different rubber with different playing features. Players acting in half distance tend to prefer soft, grippy rubbers with higher arcs. Players that rather play hard stroke spins at the table tend to harder and faster materials.

Here again, it becomes apparent that the softest rubber is also the one with the highest trajectory: JOOLA RHYZM 375 is clearly in first position before RHYZM-TECH and RHYZM 425, followed by RHYZM-P and RHYZM with harder sponge.

In respect of speed JOOLA RHYZM with the hardest sponge is ahead, followed by the spin machines, JOOLA RHYZM-P and JOOLA RHYZM-TECH. RHYZM 375 and RHYZM 425 are rated as the controlled versions of the series.

RHYZM TECH, followed by RHYZM-P, are two rubbers reaching the highest values, due to their surface structure maximally supporting spin generation. Followed by RHYZM, RHYZM 425 and RHYZM 375.

## RHYZM

Especially developed for the topspin player who plays an aggressive offensive game with extreme power, dynamics and rotation. The new, extremely grippy and spin elastic upper rubber combined with the 48° sponge provides rotation and piercing force as never before. Despite the sensational power, JOOLA RHYZM offers extreme control in passive play, whether in a short touch game over the table, chopping or offensive topspin game. At all times JOOLA RHYZM provides a new dimension of playing fun.

The JOOLA RHYZM brings rhythm to the game.

## RHYZM 425

The JOOLA Rhyzm 425 is the ideal compromise for all players that expect a best possible ball response, but at the same time cannot do without the power of an extremely hard sponge, as preferred by table tennis professionals. The speed and hardness of the JOOLA Rhyzm 425 can be classified between the JOOLA Rhyzm and the rather softer Rhyzm 375. The advanced Rhyzm surface guarantees full dynamics, extreme spin and fun when applying different spins. The Rhyzm 425 unfolds its full potential especially in topspin rallies. With this rubber you experience the exceptional "Rhyzm feeling". Choose the Rhyzm 425 and experience fun in playing like never before!

## RHYZM 375

The advanced and grippy Rhyzm surface combined with the soft large-pored sponge, provide a special "groove" at the table. It is an absolute top rubber for those players who can't do without the feeling and the sound of a soft sponge, and who prefer a rubber with a high ball flight when applying topspin to the ball. The ball contact time, extended by the soft sponge, provides precise ball response and highest control values in all playing situations. Especially when blocking, in counter duels or in return of service, the enhanced ball control is noticeable.

## SAMBA TECH

Latest rubber technology paired with a distinctive sound:

Experience the Samba feeling at it's purest with the JOOLA Samba Tech.

This rubber is a great overall package. The soft, large pored 37.5° sponge ensures a prolonged ball contact and produces an excellent ball feedback. Great control values can be reached in passive, as well as in active game situations. At the same time, it has been possible to generate extra power for offensive play due to the newly devised rubber surface. An ideal mixture for all players who lay value on controlled offensive play.

The JOOLA Samba Tech offers pure playing enthusiasm with cutting edge technology!

## SAMBA 19

The 41 degree version of the newest Samba development offers an extremely balanced relationship of feedback with a soft sponge and acceleration in the active game. The very good to control own-catapult makes the JOOLA SAMBA 19 to a rubber, that not only forgives inaccuracies when carrying out a shot, but also corrects them.

Blue sponge, latest Japanese rubber technology with special factory tuning methods and a very good value for money are the trademarks of the new Samba version.

## SAMBA 27

The JOOLA SAMBA 27, which can easily be recognised by it's red sponge, has been brought on to the market specifically developed for players who want to use the advantages of hard rubbers. The 48 degree version was able to positively convince particularly athletic topspin players, who were thrilled by the direct and exact power transmission from the rubber on the ball. The consequence: spin and speed can be precisely dosed and controlled – the placement accuracy is impressive!

## SAMBA

Nothing sounds better! The most popular JOOLA rubber, due not only to its fantastic sound when speed glued but also because of its longevity, excellent spin and optimal feeling. For years players around the world have appreciated the combination of non-skidding upper rubber and the soft, super-elastic caoutchouc underlay. And for many players the SAMBA is still the ultimate because of its spin features.

## SAMBA PLUS

Finally the big brother of the most played JOOLA rubber in recent decades is available. JOOLA classic now with incorporated speed gluing effect, that brings back the legendary Samba Sound into table tennis halls. The new SAMBA PLUS outshines all previous sound machines. Development and testing by a team of rubber developers, led by table tennis legend Jörg Roskopf, has been a lengthy process but the new SAMBA PLUS is now ready for the market. The result is an optimum composition of feeling, speed and rotation with phenomenal sound and effect. The SAMBA PLUS sets new standards in development of soft rubbers with incorporated speed glue effect.

# TEST OF SAMBAS RUBBERS

The different results of our rubber test regarding trajectory, spin and speed are not considered to be an assessment. They are only an approach to illustrate the small and subtle differences. Playing systems are individual; therefore every play-

er needs a different rubber with different playing features. Players acting in half distance tend to prefer soft, grippy rubbers with higher trajectory. Players that rather play hard stroke spins at the table tend to harder and faster materials.

Comparing trajectories of all Samba rubbers reveal that the new SAMBA 19 has the highest trajectory, due to the soft sponge and grip of the new upper rubber. In relation the trajectory of the SAMBA 27 is much flatter, the flight time of the ball shorter and therefore speed is higher. Regarding trajectory features the new SAMBA TECH is exactly in between the SAMBA 19 and SAMBA 27.

Speed measurement illustrates that the SAMBA 19 with the flattest trajectory is also ahead regarding speed. Number two after SAMBA TECH.

In respect of spin SAMBA TECH is number one, followed by SAMBA 27 and SAMBA 19. The extraordinary good spin values of the new Samba rubbers are definitely due to the new upper rubber, causing enhanced contact of the ball with the upper rubber.

## MAXXX 400

The rubber with the softest sponge of the MAXXX series (40°). Recommended for aggressive allrounders who lay emphasis on control but don't want to do without the necessary power in performance.

## MAXXX 450

The dynamic 45° Medium Geo Sponge in combination with the new upper rubber surface provides the optimum mixxx of power, spin and ball response. Ideal for spin-oriented attackers, also playing from half distance, who lay emphasis on ball feeling.

## MAXXX 500

The fastest and most dynamic rubber of the MAXXX series. The rubber is hard due to the 50° sponge, which is being used for the first time worldwide. However, the new dynamic macropore comb combination (Geo Sponge Technology) and the new pimple geometry (Geo-Force Technology) provide extreme sensitive feeling and good spin. Ideal for players with a busy training schedule who prefer harder rubbers and have been on the lookout for the 3 X-factors of a rubber.

## MAXXX-P

The JOOLA-MAXXX rubbers with the Triple X Factor! MaXXXimum power, MaXXXimum control and MaXXXimum spin are now being completed with a new variation that is even more dangerous. The new GeoGrip-Power-Technology with the even more intense friction surface is ideal in connection with the special pimple arrangement and the large macropore structure of the sponge for perfect topspin balls at the highest speed. These characteristics come to be an advantage especially when playing with the new Poly-ball. Due to it being a slightly softer version with a sponge hardness of 42,5°, the MAXXX®-P is ideal for ambitious players, who lay emphasis on control and ball feeling.

**NEW**

## GOLDEN TANGO

The new JOOLA Golden Tango is „Made in Germany“, combining the advantages of a tacky upper rubber, usually characteristic of Chinese rubbers, with the enormous elasticity and speed of a Tensor sponge.

This interaction results in a completely new sensation. The tacky surface offers maximum grip thus enabling loaded topspin and undercut strokes at the most extreme blade angles. JOOLA Golden Tango produces incredible rotation and an arched trajectory. The molecular structure of the energetic sponge underlay makes JOOLA Golden Tango extremely elastic and provides sufficient speed reserves to counter unexpected spin attacks. The sponge is very forgiving, therefore it also offers maximum control for all cut variations either at the table or from half-distance.

## GOLDEN TANGO – MORE ROTATION DUE TO STICKY RUBBER TECHNOLOGY

When the ball hits the rubber surface this is also called „coupling“ in modern table tennis. Coupling is favoured by the sticky surface of the JOOLA Golden Tango (Sticky Rubber Technology).

Especially at the most extreme topspin strokes slipping of the ball is prevented and the reliable grip of the ball is improved. The result is increased spin effect for all strokes.

## X-PLODE

Since the banning of speed glue, the X-PLODE with incorporated speed glue effect caused a sensation among players, who were seeking an alternative for the speed provided by speed gluing. The spin elastic, very grippy upper rubber in combination with the medium hard, large-pored sponge characterise the X-PLODE. The unprecedented catapult effect and the sensational spin provide "x-plosive" strokes with unrivalled rotation.

## X-PLODE SENSITIVE

The softer version of the X-PLODE!

The sensitive-touch effect conveys ball feeling of a special kind. While the first ball contact is extremely sensitive and therefore controlled, the rubber shows its full power at the ball take-off: the ball catapults like an "ex-plo-sion" off the rubber. The latest JOOLA Green Power technology in the X-PLODE SENSITIVE provides an unique, incorporated speed glue effect!

## ENERGY

Speed glue effect is incorporated to a new dimension: ENERGY in „GREEN POWER“ technology. With ENERGY GREEN POWER almost 100% of the possible increase in performance achieved by fresh gluing is permanently built in. Specially suited to players that prefer spin attack but demand control and precision.

ENERGY GREEN POWER - the new era has begun.

## ENERGY X-TRA

The ENERGY X-TRA is the next-stage development of the ENERGY, the alternative to speed gluing. The 37.5° soft sponge with the inclusive speed glue effect provides for even more spin and speed. It is especially suited to players who put emphasis on control in their strokes without giving up the advantages of speed gluing.

Green Power - incorporated speed glue effect.

## MAMBO

JOOLA MAMBO is manufactured in Japan using a revolutionary technology: The proportion of chemical packing material in the sponge and in the upper rubber are increased to the maximum permitted levels. This technique has a positive influence on the feeling of the ball and the sound without losing flexibility and speed. The result is a super-flexible and perfect rubber.

## MAMBO H

JOOLA MAMBO H is a high technology High Friction rubber. The sponge is slightly harder than that of conventional Mambo. With a special gluing technique the upper rubber, which is already designed for extreme tension, is then combined with the sponge. This results in an unbelievable natural energy. This, in combination with the extreme grippy upper rubber surface, makes it a rubber with a lot of spin.

## ZACK

With the rubber ZACK, JOOLA introduces a classic rubber made in Germany onto the market, designed specifically for all players who wish to do without an extreme catapult effect and extreme speed. Therefore it is a high-quality, all-round rubber, characterized by good control, placement accuracy and rotation tolerance. Outstanding durability and an extremely good value for money make the JOOLA ZACK a rubber that enthusiasts of classic rubbers, produced with the most modern German technology, cannot afford to miss.

## TOPSPIN C

The TOPSPIN C uses the surface of our old Topspin rubber. The secret of this unique rubber lies in the composition of the sponge. This combination of highly grippy upper rubber with a special sponge results in a defensive rubber for perfectly safe defensive play, extreme variations in chop, and superb response to the opponent's topspin.

## AXXESS

**NEW**

JOOLA AXXESS is perfectly designed to meet the requirements of ambitious beginners. The soft (37.5°), small porous sponge in combination with narrow pimples give the player excellent ball feedback and allround flexibility. The advantages of the JOOLA AXXESS come into full effect when learning specific stroke techniques or when ball control is of vital importance. The extremely grippy and elastic upper rubber also allows strokes with tremendous spin that will trouble any opponent.

## UPP

New well-priced JOOLA rubber that meets high demands. The medium hard, green sponge combined with the extremely grippy surface provides excellent "speed feeling" and also suits the player that needs full power far away from the table. JOOLA UPP is not for beginners but an alternative for players who request an adequate and top modern competition rubber at an attractive price!

## 4YOU

The logical answer, to offer a low-priced rubber for the player with a low budget. Don't be fooled by the price, this is not a rubber for beginners, but an offensive allround rubber of the best Japanese quality - ideal for the controlled offensive player. The rubbers are ideal in combination with the blades ROSSKOPF ALLROUND or EAGLE MEDIUM. Amazing value for money.

## 4ALL

The 4 ALL offers slightly more control than the 4 YOU. The 4 ALL is a classic allround rubber, which is excellent for the developing player. The 4 ALL rubber provides excellent control and is still fast and dynamic, so that all basic strokes can be played without effort.

# CWX

**NEW**

To be a successful defender nowadays it is extremely important to constantly refine all playing components. Cutting defence from half distance is not the only priority any more. Moreover, a defensive player has to be flexible. This requires pimple rubbers that enable such playing characteristics.

Therefore our goal was to develop a long pimple rubber, together with our longterm partner defending ace Chen Weixing, that meets all the requirements of modern defensive play. The result of these efforts is the JOOLA CWX.

The pink coloured (50°) sponge with integrated Tensor technology offers enormous opportunities for undercut strokes away from the table, whilst retaining control for disturbing shots close to the table due to the sponge hardness and flat trajectory. The grippy micro structure of the pimple heads and the flexibility of the narrow pimples also allows extreme chop defence with maximum control.

<b>COLORS</b> [Red/Black]	<b>PIMPLES</b> LONG	<b>SPONGE</b> OX/0.5/0.9	<b>HARDNESS</b> 50°	<b>STRATEGY</b> DEF - DEF ex	<b>SPEED</b> LOW/MEDIUM	<b>SPIN</b> EXTRA HIGH	<b>TENSOR</b> DEVELOPED BY JOOLA
------------------------------	------------------------	-----------------------------	------------------------	---------------------------------	----------------------------	---------------------------	-------------------------------------

## CWX SPONGE

## BADMAN RELOADED

For many players BADMAN was the best and most dangerous "untreated" long pimple rubber. With BADMAN RELOADED it is possible to play extreme chop shots with dangerous wobble effect - relive the experience of treated long pimples!

<b>COLORS</b> [Red/Black]	<b>PIMPLES</b> LONG	<b>SPONGE</b> OX/1.3	<b>TENSOR</b> DEVELOPED BY JOOLA
<b>HARDNESS</b> 45°	<b>STRATEGY</b> DEF - ALL	<b>SPEED</b> LOW/MEDIUM	<b>SPIN</b> MEDIUM

## OCTOPUS

Two of the world's best defensive players, Chen Weixing and Latin American Champion Liu Song rely on the long pimples rubber OCTOPUS. With OCTOPUS you can play extreme chop shots and also add variation by taking the ball early at the table. An extra hard sponge provides extremely awkward effects.

<b>COLORS</b> [Red/Black]	<b>PIMPLES</b> LONG	<b>SPONGE</b> OX/0.5/1.1-1.2	
<b>HARDNESS</b> 50°	<b>STRATEGY</b> DEF - DEF ex	<b>SPEED</b> LOW	<b>SPIN</b> MEDIUM

## SHARK

JOOLA SHARK is a long pimples rubber with disturbing effect, which has an extremely high number of pimples. A good disturbing rubber, it has 3 components, the highest possible length of pimples, the highest possible number of pimples and the thin diameter of pimples. This has been achieved almost perfectly with SHARK.

<b>COLORS</b> [Red/Black]	<b>PIMPLES</b> LONG	<b>SPONGE</b> OX/0.5/1.0	
<b>HARDNESS</b> 40°	<b>STRATEGY</b> DEF - ALL	<b>SPEED</b> LOW	<b>SPIN</b> MEDIUM/HIGH

## ORCA

The ORCA can be controlled slightly easier than the SHARK. The number of long pimples is reduced and the pimples are thicker. Therefore blocks and attacking shots are easier to play. ORCA is particularly suitable for the aggressive disturbing game at the table.

<b>COLORS</b> [Red/Black]	<b>PIMPLES</b> LONG	<b>SPONGE</b> OX/0.5/1.0	
<b>HARDNESS</b> 40°	<b>STRATEGY</b> OFF - OFF ex	<b>SPEED</b> LOW	<b>SPIN</b> MEDIUM

## EXPRESS ULTRA

Speed gluing became popular with short pimple players a long time ago. The time is now right to introduce EXPRESS ULTRA, the pimples out version with incorporated speed glue effect - the short pimple designed for professionals and ambitious offensive players.

## TANGO ULTRA

A short pimples rubber using the TENSOR effect and the result is not surprising: softer, more control and more spin but also with dramatic effects from the pimples. For passive blocking, TENSOR absorbs the energy but for active blocking and attack the rubber really explodes.

## TONI HOLD

The original anti spin rubber - unrivalled for total control. The best answer to topspin and strong spin.

## AMY CLASSIC VERSION

The AMY CLASSIC VERSION has very soft 1.0 mm sponge and is therefore slightly harder to control - however, the spin reversal when blocking is considerably more dangerous. In addition, this rubber also allows attacking and wobble shots.

## AMY CONTROL VERSION

The AMY CONTROL VERSION has a novel, very thin sponge, providing good control. Even hard topspins can be returned without any problem.

# RUBBER TECHNOLOGIES

**Green Power**  
Performance achieved from fresh gluing is permanently incorporated into the rubber.

**Geo-Force Power**  
Newly designed pimple arrangement with a more hollow space between the single pimples provides maximum spin and best possible control.

**Geo-Grip Power**  
This develops significantly more grip of the ball for more spin due to an intense friction surface structure.

**Tensor**  
Incorporated inner tension in the sponge and upper rubber. More elasticity, more spin, more speed and more feeling.

**Geo-Sponge Power**  
Innovative macropore sponge design that increases the catapult effect therefore enabling higher ball trajectories.

**SRT (Sticky Rubber Technology)**  
The innovative technology gives stickiness to the rubber. Improved adhesive force at the moment of contact provides extreme spin, therefore avoiding slipping of the ball.

## TABLE TENNIS RUBBERS DIFFER AS FOLLOWS

Joola has made the decision to cease using the old numerical system of rubber rating.

**We believe that our new classification system is easier to understand and that an exact classification into very precise ratings is impossible and highly subjective.**

We will keep the traditional categories of playing features, but classification now has only 4 levels:

### PIMPLES IN

THE „standard“ rubber. Combination of upper rubber (pimples pointing inward) and sponge, available in thicknesses of 1.0 – 2.3mm.

### SHORT PIMPLES

Rubber with pimples upper rubber (pimples pointing outward). Short pimples are especially used for blocking and counter play.

### LONG PIMPLES

Available without sponge (ox) or with different sponge thicknesses. Long pimples are for blocking/disturbing game at the table as well as chopping from half distance.

### ANTI-SPIN

Combination from plain upper rubber and sponge. The plain surface facilitates returning of balls with a lot of rotation (service, spin).

## THE PLAYING FEATURE CATEGORIES

In General JOOLA differentiate four categories of playing features, each illustrated by an App.

### SPEED

Defines speed of the ball when catapulted from the player's racket. The higher the speed of the blade the higher the ball bounce. For beginners we recommend rackets with with less speed.

### SPIN

Defines rotation produces by hitting the ball. The higher the grip of a rubber the more rotation can be given to the ball by touching.

### HARDNESS

In addition the rubbers are classified according to the hardness of the sponge (degree). The harder the rubber the more speed. The softer the rubber the more sensitive and controlled.

## SPONGE

Rubbers are available with different sponge thickness from 0x – 2mm. The thicker the sponge the faster the rubber.

## PLAYING STRATEGIES

In order to choose the most suitable equipment every player should decide into which playing strategy they fall.

Classic, pure defensive play behind the table with occasional attacking shots.

Modern defensive play, also at the table, with positioned offensive shots.

Modern defensive play using special rubbers (e.g. Badman), aimed at disturbing the opponent's offensive play.

All techniques/stroke variations are played. Controlled shots, various rotation shots and positioned shots are more important than speed. One stroke side (usually backhand) is focused on blocking or counter play.

Various topspin techniques, often from half distance are paramount. Offensive play with precise attacking shots and variation of topspin. Often shots with later hitting of the ball and higher ball trajectory are played.

Dominant topspin strokes from both sides. Topspin is not only the preparing but also the point-making stroke.

Offensive players with uncompromising risk tolerance. Speed oriented stroke and power spin are paramount. Speed is prior to spin and variations.

# BLADES

HIGH QUALITY MATERIALS,  
PLAYABILITY, INNOVATION

## PBO-c – HIGH TECH FIBRES – FOR UNIQUE PLAYING FEATURES

Tear resistant and high elasticity are the outstanding features of the PBO fibre.

Poly(p-phenylen-2,6-benzobisoxazol (PBO)) is a synthetic Polymer which is also used in formula 1 cars and aeronautics because of its unique characteristics.

In tests it was established that the interweaving of the PBO fibre bundles with the carbon fibres ( in chessboard pattern ) provide unique playing features for table tennis blades.

On the one hand the blade gains stability through the combination with the PBO-c fabric, and on the other, the elastic PBO fibre and the slightly harder carbon fibre result in a softer stroke feeling. This ideally suits a spin dynamic but controlled offensive play. The enlarged sweet spot also guarantees an even bounce and therefore reduces the error rate.

Our new blades JOOLA "Nobilis PBO-c" and JOOLA "Zelbro PBO-c" show how the PBO fibre in combination with proven carbon refine a table tennis blade and make it something absolutely unique.

**NEW**

## NOBILIS PBO-c

The new JOOLA Nobilis: The name says it all!

Only the most precious and high-quality materials are used for this blade. The design and excellent workmanship in every detail speak for themselves. The structure of the single veneers and layers make the JOOLA Nobilis special: the PBO-c fibres are directly placed on the Kiri core veneer. The 1.2mm hard Hinoki outer veneers give the blade a prolonged ball contact time in addition to the traditionally good playing feel and allow the most extreme spin ball at high trajectory. This construction gives the blade stability, elasticity and a lot of force, enabling very precise play even at high speed. The interaction of the individual components make the JOOLA Nobilis PBO an offensive blade that is more than just fast: balanced, good spin, precise with pure feeling. The JOOLA Nobilis PBO - in its own class!

<b>5 PLY</b> 	<b>STRATEGY</b>  OFF - OFF ex	<b>SPEED</b>  FAST/EXTREME	<b>TOUCH</b>  HARD	<b>BLADE SIZE</b>  157x151	<b>THICKNESS</b>  1 7,1	<b>FLARED</b>  100x25	<b>STRAIGHT</b>  100x24	
------------------	-------------------------------------	----------------------------------	--------------------------	----------------------------------	----------------------------------	-----------------------------	-------------------------------	--

## ZELEBRO PBO-c

The new JOOLA Zelebro PBO is an absolutely top class blade, only the best materials are used. This 7-ply offensive miracle develops explosive and direct power without losing control.

The centrepiece of the sensitive JOOLA Zelebro PBO-c is the synthetic PBO Poly(p-phenylen-2,6-benzobisoxazol) fibres, plain woven with the carbon bundles, directly positioned under the Limba upper veneer. This causes an enlarged sweet spot, a lot of dynamics and a medium hard stroke at flat trajectory due to the interaction of the ratio of natural woods ((Limba,Kiri,Koto) and the PBO carbon fibre fabric. The vibration dampening effect of the PBO-c compound and the even ball bounce are ideal for all players preferring direct offense and precise positioning.

This blade is an asset in every playing situation which is exactly what players expect from a blade!

## P. SOLJA OFF+

This blade, used by the current world ranked no.15 and bronze medal winner at the 2016 Olympic Games with the German women's team, impresses by a perfect combination of speed and playing feel. Since the introduction of the plastic ball, Petri has been looking for a blade that meets her high requirements. A blade that provides a lot of dynamics for her offensive game and also offers maximum feeling and precision in block and counter duels.

The balanced playing features of the 7-ply JOOLA P.SOLJA OFF+ are the result of the special veneer combination. High-quality Hinoki outer veneers provide for a sensitive and direct stroke in all playing situations. Carbon fibre directly on the Kiri core veneer provides an enlarged sweet spot and the necessary speed development.

The JOOLA P.SOLJA OFF+ is an offensive blade for players of all classes who prefer a blade with a special touch.

<b>7 PLY</b>	<b>STRATEGY</b> OFF - OFF ex	<b>SPEED</b> FAST/EXTREME	<b>TOUCH</b> HARD	<b>BLADE SIZE</b> 155x151	<b>THICKNESS</b> 6,3	<b>FLARED</b> 101x26	<b>STRAIGHT</b> 101x23	<b>CARBON</b>

**NEW**

## P. SOLJA OFF-

This sensational 5-ply full blade is convincing for players of all performance levels. The secret of the P.SOLJA OFF- is the balance of speed, lightness and ball feeling. The slightly thicker Limba outer veneers give the P.SOLJA OFF- a longer dwell time and therefore a high trajectory, which benefits players who spin.

The soft pine veneer conveys an equally soft stroke feeling to the player and provides maximum ball control in critical situations.

The P.SOLJA OFF- impresses by its extraordinary playing features. It can be used in many ways and is suitable for all playing types from half-distance topspin players to block and counter play at the table.

The P.SOLJA OFF- takes the modern allround game to the next level!

<b>5 PLY</b>	<b>STRATEGY</b> ALL - OFF	<b>SPEED</b> MEDIUM/FAST	<b>TOUCH</b> MEDIUM	<b>BLADE SIZE</b> 156x149	<b>THICKNESS</b> 5,8	<b>FLARED</b> 100x25	<b>STRAIGHT</b> 100x23
--------------	------------------------------	-----------------------------	------------------------	------------------------------	-------------------------	-------------------------	---------------------------

**NEW**

## WINNING IS SO EASY

JOOLA presents two first class blades classed into the lowest weight category. Due to a special drying process and a prolonged storage period of the wooden veneers, the moisture in the wood has been extracted to a very high degree. The result is two extremely light blades with excellent playing characteristics. The player needs less power to hold the racket, which can then be invested in concentrating on controlled movements when playing a shot.

A special and costly selection process during each production step guarantees that the given weight values are strictly followed and are guaranteed by JOOLA.

### AIR CARBON

The JOOLA AIR CARBON is the offensive version of this series. The JOOLA AIR fundamental character is maintained, due to the 5mm thick Balsa core: unique playing feeling and controllability. This version is also an absolute lightweight with a guaranteed 71-72g. The player profits from the saved power and can invest it in his/her game. Due to the two Carbon layers, the JOOLA AIR CARBON gains also in speed and precision for the offensive game!

<b>7 PLY</b> 	<b>STRATEGY</b> OFF- / OFF- ex.	<b>SPEED</b> FAST/EXTREME	<b>TOUCH</b> HARD	<b>BLADE SIZE</b> 155x149	<b>THICKNESS</b> 7,6	<b>FLARED</b> 100x25	<b>STRAIGHT</b> 100x23	<b>CARBON</b>
------------------	------------------------------------	------------------------------	----------------------	------------------------------	-------------------------	-------------------------	---------------------------	---------------

### AIR FIBRE

JOOLA presents a top class blade with the JOOLA AIR FIBRE. The single wooden veneers are selected very carefully according to the highest quality standards. This enables the guaranteed feather-weight of 59-60g. The 4mm thick Balsa core, which is encased on both sides by high quality fiber glass, produces „pure ball feeling“ with excellent control values. It is an experience to play with this blade! The JOOLA AIR FIBRE is probably the only blade worldwide, which is guaranteed to weigh a maximum of 60 grams!

<b>7 PLY</b> 	<b>STRATEGY</b> ALL/OFF-	<b>SPEED</b> MEDIUM	<b>TOUCH</b> MEDIUM	<b>BLADE SIZE</b> 155x149	<b>THICKNESS</b> 6,1	<b>FLARED</b> 100x25	<b>STRAIGHT</b> 100x23	<b>FIBRE</b>
------------------	-----------------------------	------------------------	------------------------	------------------------------	-------------------------	-------------------------	---------------------------	--------------

## TPE FEELING

High value OFF blade with an exclusive „burned“ Hinoki top layer. The noble Hinoki which is heated up using a special technique, ensures a high stiffness and consistent, balanced playing feeling features on the whole face of the blade. The employed Ayous and Koto veneers make the blade very controllable without losing much speed.

## TPE NATURE

A true rarity are very light, natural Limba veneers, which do not only ensure the JOOLA Nature a noble appearance, but also an exceptional feeling. This experience is supported by a seven layer build-up of Ayous veneers. Offensive topspin balls, hard smashes or well-placed block balls, the JOOLA Nature is aggressive but still tame. A playing feeling which every player dreams of.

## TPE PERFORM

A progressed development of the JOOLA classic „Roskopf-Emotion“. The selected Hinoki top layer is specially heated - due to this the blade is even more resistant against bending and guarantees high control even when carrying out the fastest shots. The built-in Carbon fibers not only enlarge the Sweetspot, but also help produce a higher, more spin-orientated ball flight.

## TPE FIGHT

A special type of Aramid fiber blade. On top of the high value Kevlar Carbon texture (Kevlar owns the largest specific tear resistance related to the weight), only particularly high value and selected materials are used in the production of the JOOLA FIGHT. The extremely quick blade also allows topspin balls to be played with feeling and a lot of spin. Surprising and point winning speed changes are possible, especially when playing long spin rallies.

## ROSSKOPF EMOTION

The carbon fibre core of the blade creates an enhanced sweet spot which results in excellent control. In comparison with other blades with carbon core, the ROSSKOPF EMOTION impresses with a relatively soft feel and a high trajectory, due to the specially selected Hinoki surface. The blade offers the best possible balance between feeling in passive and speed in active play.

<b>7 PLY</b> 	<b>STRATEGY</b> ALL - OFF ex.	<b>SPEED</b> FAST	<b>TOUCH</b> HARD	<b>BLADE SIZE</b> 156x152	<b>THICKNESS</b> 5,9	<b>FLARED</b> 	<b>STRAIGHT</b> 	<b>ANATOMIC</b> 101x25	<b>CARBON</b> 
------------------	----------------------------------	----------------------	----------------------	------------------------------	-------------------------	-------------------	---------------------	---------------------------	-------------------

## ROSSKOPF FIRE

The classic among fast offensive blades! Seven specially selected veneers provide high torsion rigidity. The blade impresses with its dynamic and is ideal for a speed orientated attacking game close to the table. JOOLA - top quality at a great price - a blade for the highest demands.

<b>7 PLY</b> 	<b>STRATEGY</b> OFF/OFF	<b>SPEED</b> FAST	<b>TOUCH</b> MEDIUM	<b>BLADE SIZE</b> 156x149	<b>THICKNESS</b> 6	<b>FLARED</b> 	<b>STRAIGHT</b> 	<b>ANATOMIC</b> 100x25	<b>LAG</b> 
------------------	----------------------------	----------------------	------------------------	------------------------------	-----------------------	-------------------	---------------------	---------------------------	----------------

## ROSSKOPF FORCE

For the uncompromising offensive player who wants a hard, direct and modern carbon blade, the ROSSKOPF FORCE is a must. Due to the flat trajectory and the enormous acceleration, this offensive blade will convince every player that wants to force the direct point with fast stroke spins. The exclusive design and the excellent playing characteristics make the ROSSKOPF FORCE a bestseller.

<b>7 PLY</b>	<b>STRATEGY</b> OFF - OFF ex.	<b>SPEED</b> EXTREM	<b>TOUCH</b> EXTRA HARD	<b>BLADE SIZE</b> 155x151	<b>THICKNESS</b> 6,3	<b>FLARED</b> 104x25	<b>STRAIGHT</b> 102x23	<b>ANATOMIC</b> 101x26	<b>CARBON</b>
--------------	----------------------------------	------------------------	----------------------------	------------------------------	-------------------------	-------------------------	---------------------------	---------------------------	---------------

## ROSSKOPF ALLROUND

The most popular JOOLA blade, it provides ideal control values due to the special 7-ply construction and conveys excellent ball feeling. With the ROSSKOPF ALLROUND you always have the right answer, in sensitive attacking as well as block and counter play.

<b>7 PLY</b>	<b>STRATEGY</b> ALL/OFF-	<b>SPEED</b> MEDIUM	<b>TOUCH</b> SOFT	<b>BLADE SIZE</b> 156x149	<b>THICKNESS</b> 6,1	<b>FLARED</b> 100x25	<b>STRAIGHT</b> 100x23	<b>ANATOMIC</b> 100x25	
--------------	-----------------------------	------------------------	----------------------	------------------------------	-------------------------	-------------------------	---------------------------	---------------------------	--

## ROSSKOPF JUNIOR

The ROSSKOPF JUNIOR is the exact reproduction of the ROSSKOPF ALLROUND. The blade is specially designed for children with a smaller and thinner handle. In order to keep the balance of the blade the surface is slightly smaller. The result is the ROSSKOPF JUNIOR, the ideal blade for children.

<b>7 PLY</b>	<b>STRATEGY</b> DEF - ALL	<b>SPEED</b> MEDIUM	<b>TOUCH</b> SOFT	<b>BLADE SIZE</b> 151x145	<b>THICKNESS</b> 6	<b>FLARED</b> 92x22

Men's singles 5th place

African Championships 2016:  
Men's singles 2nd place

African Cup 2016:  
Men's singles 1st place

## ARUNA OFF

Aruna Off is the current blade of the JOOLA top star, which he already used at his sensational performance at the World Cup 2014 in Düsseldorf. The only thing that has been modified is the design.

Ideal feedback for a good ball feeling and high controllability are the major features. Despite this, the 7-ply blade still increases rotation at topspin in an ideal way. The Aruna Off also has the necessary power for maximum speed due to its modern carbon technology.

<b>7 PLY</b> 	<b>STRATEGY</b>  ALL - OFF ex.	<b>SPEED</b>  FAST	<b>TOUCH</b>  HARD	<b>BLADE SIZE</b>  156x152	<b>THICKNESS</b>  5,9	<b>FLARED</b>  103x25	<b>STRAIGHT</b>  101x23
------------------	--------------------------------------	--------------------------	--------------------------	----------------------------------	-----------------------------	-----------------------------	-------------------------------

## ARUNA OFF+

Fast, aggressive version of the new Aruna blade series, that shows all its potential when playing quick topspin shots. However, the basic attribute was maintained: ideal feedback for ball feeling and controllability.

<b>5 PLY</b> 	<b>STRATEGY</b>  OFF/OFF ex.	<b>SPEED</b>  EXTREME	<b>TOUCH</b>  HARD	<b>BLADE SIZE</b>  155x151	<b>THICKNESS</b>  6,3	<b>FLARED</b>  101x26	<b>STRAIGHT</b>  101x23
------------------	------------------------------------	-----------------------------	--------------------------	----------------------------------	-----------------------------	-----------------------------	-------------------------------

## K5

The JOOLA K5 does not only fall into the category of first class high-tech blades due to its exclusive design! In practice, vibration control is achieved through the RAG technology and the JOOLA "honeycomb", which is almost legendary amongst experts. With these features the K5 has become an established bestseller.

<b>5 PLY</b> 	<b>STRATEGY</b> OFF - OFF ex.	<b>SPEED</b> FAST	<b>TOUCH</b> MEDIUM	<b>BLADE SIZE</b> 156x151	<b>THICKNESS</b> 6	<b>FLARED</b> 101x25	<b>STRAIGHT</b> 101x23	<b>ANATOMIC</b> 100x25	
------------------	----------------------------------	----------------------	------------------------	------------------------------	-----------------------	-------------------------	---------------------------	---------------------------	--

## K6

The K6 with the Round About Grip technology is a blade of the highest quality. The K6 is an offensive blade without compromise – the middle layer made of Blue-Texalium guarantees excellent stiffness which means that it is almost distortion-free and the size of the sweet spot remains consistent. Speed and control of the K6 offer perfect playing balance and the RAG grip guarantees excellent ball feedback.

JOOLA K6 – a modern and extremely ambitious high-tech blade that guarantees all requirements of a competition blade, especially for top players.

<b>7 PLY</b> 	<b>STRATEGY</b> ALL - OFF ex.	<b>SPEED</b> FAST	<b>TOUCH</b> HARD	<b>BLADE SIZE</b> 158x151	<b>THICKNESS</b> 6,5	<b>FLARED</b> 101x25	<b>STRAIGHT</b> 101x23	<b>ANATOMIC</b> 100x25		
------------------	----------------------------------	----------------------	----------------------	------------------------------	-------------------------	-------------------------	---------------------------	---------------------------	--	--

## K7

The Carbon-NetT-Material was used for the first time in the JOOLA K7. Carbon-NetT is lighter than other carbon fabrics and still provides the wanted stiffness that is responsible for the speed of the blade. The Enzo layers used at bonding provide high control, which can't be taken for granted on carbon blades. The RAG handle, exclusively developed by JOOLA, additionally increases this control.

<b>7 PLY</b> 	<b>STRATEGY</b> OFF - OFF ex.	<b>SPEED</b> EXTREME	<b>TOUCH</b> HARD	<b>BLADE SIZE</b> 158x151	<b>THICKNESS</b> 6,3	<b>FLARED</b> 100x25	<b>STRAIGHT</b> 100x23	<b>ANATOMIC</b> 100x25		
------------------	----------------------------------	-------------------------	----------------------	------------------------------	-------------------------	-------------------------	---------------------------	---------------------------	--	--

## FALCON MEDIUM

Pure control – that is what the 4 Ayous-layers in the FALCON medium stand for. The mid-veneer which consists of „Tung-Wood“ provides the necessary stiffness for hard topspin balls.

5 PLY	STRATEGY DEF - ALL	SPEED MEDIUM	TOUCH SOFT	BLADE SIZE 158x151	THICKNESS 6,8	FLARED 101x26	STRAIGHT 100x23	ANATOMIC 100x24
-------	-----------------------	-----------------	---------------	-----------------------	------------------	------------------	--------------------	--------------------

## FALCON FAST

7 layered blade with excellent well-controlled offensive characteristics. The top veneers consisting of „Lymph-Wood“ provide the speed, whereas the 5 Ayous-layers are responsible for the required control.

7 PLY	STRATEGY ALL/OFF-	SPEED FAST	TOUCH MEDIUM	BLADE SIZE 158x151	THICKNESS 6,4	FLARED 101x24	STRAIGHT 100x22	ANATOMIC 100x24
-------	----------------------	---------------	-----------------	-----------------------	------------------	------------------	--------------------	--------------------

## FALCON FAST+

High quality veneers in an exceptional composition: the offensive blade with „soul“ is alive for every shot and allows precise balls to be played, especially at high speed. The soft „White Birch“ mid-veneers are responsible for the high control values.

7 PLY	STRATEGY ALL - OFF	SPEED FAST	TOUCH MEDIUM	BLADE SIZE 158x151	THICKNESS 5,8	FLARED 101x24	STRAIGHT 100x23	ANATOMIC 100x24
-------	-----------------------	---------------	-----------------	-----------------------	------------------	------------------	--------------------	--------------------

## EAGLE MEDIUM

High control, good speed, very low weight and a fabulous price are the secrets of the EAGLE MEDIUM. The blade that allows ambitious table tennis players the fun of playing table tennis has its origin in a well-engineered and proven production technology. Because of the well-balanced speed and control, the EAGLE MEDIUM is also suitable as a beginner blade for children and youth training.

## EAGLE FAST

The EAGLE FAST, a low-budget balsa blade. The high quality manufactured offensive blade weighs only 70 grams. One should not philosophise too long about the special playing features – you have to experience it for yourself. And with this JOOLA blade it feels as though you can do nothing wrong.

## EAGLE CARBON EXTREME

The EAGLE CARBON EXTREME offers sheer carbon fun. Its subtle, anthracite coloured design signals the drop-dead carbon philosophy of the blade.

The hard, carbon-reinforced core is veneered with Kiri wood and provide it's complete controlled power. The sweetspot, enlarged by carbon, guarantees the best possible ball feeling for the player. The noble design is eye catching.

### MIKADO ALL+

Error-reducing, 5-ply All+ blade, especially addressing the controlled, observant offensive player, who wants to dominate the opponent by means of counter-attacking.

5 PLY	STRATEGY OFF- / OFF ex.	SPEED MEDIUM	TOUCH SOFT	BLADE SIZE 157x150	THICKNESS 5,6	FLARED 100x22	STRAIGHT 100x23
-------	----------------------------	-----------------	---------------	-----------------------	------------------	------------------	--------------------

### MIKADO OFF

Speed-controlled, 5-ply Off blade with plenty of spin, ideal for a spin-orientated offensive game. The blade generates a good curve when playing topspin shots, even away from the table, guaranteeing control of the game.

5 PLY	STRATEGY OFF- / OFF	SPEED FAST	TOUCH SOFT	BLADE SIZE 157x150	THICKNESS 6	FLARED 100x22	STRAIGHT 100x23
-------	------------------------	---------------	---------------	-----------------------	----------------	------------------	--------------------

### MIKADO OFF+

Speed-dominant, 7-ply Off+ blade for the point-orientated topspin and smash player. The intelligent veneer combination provides excellent feedback of the blade, thus enabling an easy control of it's aggressiveness.

7 PLY	STRATEGY OFF- / OFF	SPEED EXTREME	TOUCH MEDIUM	BLADE SIZE 157x150	THICKNESS 6	FLARED 100x22	STRAIGHT 100x23
-------	------------------------	------------------	-----------------	-----------------------	----------------	------------------	--------------------

## SPIRIT ALL+

The employed veneers of Balsa and blue Ayous for the 4,5mm strong core make the SPIRIT ALL+ an excellent to control allround blade of the slightly more offensive type with great feeling. The approximately 80g heavy blade lies well in the hand and guarantees fun when playing.

## SPIRIT OFF

The core layer of the SPIRIT OFF is 6mm thick. The thicker Balsa veneer in connection with the red Ayous layers make the blade much faster and less elastic. This guarantees controlled counter and topspin balls at high speed.

## SPIRIT OFF+

The highlight of the SPIRIT series! The 6,5mm thick core (Balsa with black and therefore harder Ayous veneers) guarantees the highest speed and hardest topspins. The optimal bending strength (due to the special gluing of the core) and the employment of the 0,8mm thick Koto top veneer ensure that speed is the greatest aspect of the blade.

## WING MEDIUM

WSI technology (Wing Shaft Integration) provides a totally new feel. The handle is integrated into the blade like a wing thus providing excellent stability. The layers of precious Hinoki are aerodynamically shaped into the handle so that the grip fits perfectly in the hand. The combination of veneers provides well-balanced playing features and is ideal for players with a lot of spin and a precise blocking game.

<b>5 PLY</b>	<b>STRATEGY</b> ALL/OFF-	<b>SPEED</b> MEDIUM	<b>TOUCH</b> MEDIUM	<b>BLADE SIZE</b> 155x152	<b>THICKNESS</b> 6,2	<b>FLARED</b> 103x25	<b>STRAIGHT</b> 101x23	<b>ANATOMIC</b> 101x25	
--------------	-----------------------------	------------------------	------------------------	------------------------------	-------------------------	-------------------------	---------------------------	---------------------------	--

## WING MEDIUM JUNIOR

The classic JOOLA blade Wing Medium is now also in a special child and youth version available. It is the first time that the JOOLA WSI technology is being employed in a junior blade. In this procedure, the handle is drawn into the face of the blade in the shape of a wing, giving the blade an improved stability. The built-in elements, which are made of high quality Hinoki, are sanded down in the handle so that they are extremely round. This develops an amazing feeling of the handle, especially for small hands.

<b>5 PLY</b>	<b>STRATEGY</b> ALL/OFF-	<b>SPEED</b> MEDIUM	<b>TOUCH</b> MEDIUM	<b>BLADE SIZE</b> 152x148	<b>THICKNESS</b> 6,2	<b>FLARED</b> 96x22		
--------------	-----------------------------	------------------------	------------------------	------------------------------	-------------------------	------------------------	--	--

## FLAME FAST

The FLAME FAST proves the fact that high speed and good control don't have to be a contradiction. The precious 0.8mm Hinoki upper layer, in combination with the BURNtec finishing, guarantees an extra class blade for all offensive players. The hard Kiri core veneer provides the necessary torsion rigidity in order to generate maximum power for aggressive top spin shots. A high class blade for all players, that take advantage of top spin play.

<b>5 PLY</b>	<b>STRATEGY</b> ALL - OFF ex.	<b>SPEED</b> FAST	<b>TOUCH</b> MEDIUM	<b>BLADE SIZE</b> 156x152	<b>THICKNESS</b> 6,8	<b>FLARED</b> 103x25	<b>STRAIGHT</b> 101x23	
--------------	----------------------------------	----------------------	------------------------	------------------------------	-------------------------	-------------------------	---------------------------	--

## FEVER

An almost perfect blade with high stability and precise alignment of the centre core. The lightweight Meliorate Carbon provides not only an extra large sweet spot, but also perfect balance. The Limba veneers allow you to feel the bounce of every ball and therefore give the blade extreme control.

<b>7 PLY</b>	<b>STRATEGY</b> OFF - OFF ex.	<b>SPEED</b> FAST	<b>TOUCH</b> HARD	<b>BLADE SIZE</b> 155x151	<b>THICKNESS</b> 5,9	<b>FLARED</b> 103x25	<b>STRAIGHT</b> 102x23	<b>ANATOMIC</b> 102x25	
--------------	----------------------------------	----------------------	----------------------	------------------------------	-------------------------	-------------------------	---------------------------	---------------------------	--

## VIVA

The VIVA is a remodel of the legendary VIVA blade. The 7 layer blade offers excellent balance, which is the basis for the extraordinary spin features. The VIVA is a proven top offensive blade at an unbeatable price.

<b>7 PLY</b>	<b>STRATEGY</b> OFF - OFF ex.	<b>SPEED</b> FAST	<b>TOUCH</b> HARD	<b>BLADE SIZE</b> 159x146	<b>THICKNESS</b> 6,6	<b>FLARED</b> 101x25	<b>STRAIGHT</b> 101x23	<b>ANATOMIC</b> 101x25
--------------	----------------------------------	----------------------	----------------------	------------------------------	-------------------------	-------------------------	---------------------------	---------------------------

## COLT – FLEXIBILITY IN THE WRIST

The JOOLA COLT series gives the hand optimum grip position, therefore providing even more playing variations. It may feel a little unusual at first, but then it will be innovative and finally brilliant. The specially developed ergonomic handle protects the wrist and provides ideal power transmission from the forearm. All strokes can now easily be performed because of more flexibility in the wrist.

### COLT OFF SPEED

Lots of power for the active spin player, so that extreme gaming situations can be mastered. That is the hallmark of this modern OFF-blade with a balsa core. Together with the new ergonomic handle, the Colt OFF stands for pure enthusiasm when playing!

### COLT OFF CONTROL

Very balanced offensive blade with excellent control in serve and receive situations and when playing passively. At the same time, it offers enough power to dominate the opponent when playing actively.

### BLACK ROSE

The new JOOLA OFF blade BLACK ROSE guarantees “pure ball feeling”, due to the 7-ply combination from selected African veneers and the proven Swedish construction. The extreme balance between maximum control and high speed make this blade a friend of any ambitious player.

### VIKING

Extremely fun to play with, classic Swedish blade that revives the long JOOLA tradition of blades from Sweden. The 7-ply blade in a classic design guarantees fantastic feedback and therefore best possible ball feeling. Quick and well controllable, top-class offensive blade.

## CHEN DEFENDER

For some time, the Chen Weixing Defensive blade has been one of the most popular defensive blades. Working with the world class defensive player from Austria, we have developed another blade designed for extreme defensive players. The CHEN DEFENDER is an oversize blade with considerably more control. The Enzo glue layer between two Samba veneers provides greater control and tremendous feel of the ball.

<b>7 PLY</b> 	<b>STRATEGY</b> DEF - DEF ex 	<b>SPEED</b> LOW 	<b>TOUCH</b> SOFT 	<b>BLADE SIZE</b> 169x162 	<b>THICKNESS</b> 7,5 	<b>STRAIGHT</b> 101x23 
------------------	-------------------------------------	-------------------------	--------------------------	----------------------------------	-----------------------------	-------------------------------

## CHEN WEIXING

Designed by Europe's best defensive player, it is best suited to a variable and controlled chop defensive game. However, fast topspin shots, as played by Chen Weixing, are also possible without any problem. The layers of black-cloth in the construction provide increased control.

<b>7 PLY</b> 	<b>STRATEGY</b> DEF - ALL 	<b>SPEED</b> MEDIUM 	<b>TOUCH</b> SOFT 	<b>BLADE SIZE</b> 165x159 	<b>THICKNESS</b> 5,9 	<b>FLARED</b> 103x25 	<b>STRAIGHT</b> 103x23 
------------------	----------------------------------	----------------------------	--------------------------	----------------------------------	-----------------------------	-----------------------------	-------------------------------

## CHEN JUNIOR

Chen Weixing has applied the knowledge gained from training with young Chinese players. It is well-balanced for a child's hand. Ideal relation of speed and control for learning basic strokes.

<b>5 PLY</b> 	<b>STRATEGY</b> DEF - ALL 	<b>SPEED</b> MEDIUM 	<b>TOUCH</b> SOFT 	<b>BLADE SIZE</b> 152x142 	<b>THICKNESS</b> 6,8 	<b>FLARED</b> 90x24 	
------------------	----------------------------------	----------------------------	--------------------------	----------------------------------	-----------------------------	----------------------------	--

## TONI HOLD WHITE SPOT

The defensive classic blade! Specially suitable for anti-top rubbers. The cottonwood veneers are extremely soft and very slow providing great control.

<b>5 PLY</b> 	<b>STRATEGY</b> DEF - DEF ex 	<b>SPEED</b> LOW 	<b>TOUCH</b> EXTRA SOFT 	<b>BLADE SIZE</b> 163x155 	<b>THICKNESS</b> 5,7 	<b>STRAIGHT</b> 101x24 
------------------	-------------------------------------	-------------------------	--------------------------------	----------------------------------	-----------------------------	-------------------------------

# BLADE FEATURES

JOOLA has made the decision to cease using the old numerical system of blade rating according to values of 0-100 or even more. We believe that our new classification system is easier to understand and that an exact classification into very precise ratings is impossible and highly subjective. The most relevant features of JOOLA blades are illustrated as APPS.

## VENEERS

JOOLA blades consist of 5 or 7 veneers.

## HANDLE SHAPES

Within our product range we distinguish between three different handle shapes. Flared, Straight and Anatomic.

## HANDLE AND BLADE DIMENSIONS

As there are considerable differences with regard to handle/blade dimensions, we attach the corresponding values to our blade pages. They should give the idea of actual blade dimensions. To simplify, these values are illustrated as Apps. However, there might be minimal deviations due to production.

## PLAYING STRATEGIES

In order to choose the most suitable equipment every player should decide into which playing strategy they fall.

**STRATEGY DEF** Classic defensive orientated game away from the table with an occasional attacking shot.

**STRATEGY DEF** Modern defensive game, also close to the table, with placed attacking balls.

**STRATEGY DEF extreme** Modern „material“ game with special rubbers (e.g. Badman), with the aim to disrupt the opponent's attacking game.

**STRATEGY ALL** All techniques/shots are played. Controlled shots, variation of spins and placement are more important than speed. One side, usually the backhand side, is focused on blocking or counter shots.

**STRATEGY OFF** Variable topspin techniques, often away from the table, are in focus. The balls are mostly played with a later contact point and have a higher ball flight.

**STRATEGY OFF** Game-determining topspin shots from both sides dominate the game. The topspin is not only the set-up, but also the point-winning shot

**STRATEGY OFF extreme** Offensive player who plays with a lot of risk. Speed-orientated and power-topspins stand out from other shots. Speed is more important than spin and variation.

## SPEED

Defines speed of the ball when catapulted from the player's racket. The higher the speed of the blade the higher the ball bounce. For beginners we recommend rackets with with less speed.

## TOUCH

The term „Touch“ is used for classification of response (extra soft, soft, medium, hard, extra hard) when the ball hits the blade.

### In general:

The harder the touch (e.g. extra hard) the flatter the ball trajectory.  
The softer the touch (e.g. extra soft) the higher the ball trajectory.

# BLADE TECHNOLOGIES

**MCS - Multiple Compound System**  
The veneers are block glued, and afterwards cut across and glued again.

**RAG**  
The veneers are block glued, and afterwards cut across and glued again.

**Flow glue**  
Glue used in aeroplane construction provides an extremely hard, almost vibration free blade.

**Junior blade**  
Blades especially designed for a child's hand, with smaller blade and shorter handle.

**CARBON**  
The classic among the used fibres. Increased the sweet spot, reduced vibration.

**FIBRE**  
Specially refined VV fibre for highest stability and enlarged sweet spot.

**CARBON CS**  
Extra catapult effect for speed and spin.

**meliorate CARBON**  
Very hard and expensive carbon material. Large sweet spot, unrivalled control.

**WSI (Wing-Shaft-Integration Technology)**  
The JOOLA blade innovation with Wing-Shaft-Integration Technology Wing-shaped handle reinforcement.

**BURNtec**  
Almost warp-free blade with moisture removed.

**Balsa**  
Soft power with extra feeling at lowest weight!

**Texalium**  
Aluminium coated fiberglass fabric, large sweet spot, good acceleration.

**PBO-c**  
Extremely tear-proof and elastic high tech fibre for unique playing features. Sensitive touch, outstanding spin dynamics.

**BALLS**

# PLASTIC BALL - SEAMLESS -

## FLASH

The new production method for manufacture of the seamless JOOLA Flash provides sensational playing features: an even bounce, stable flight, consistent spin and exceptional durability.

Box of 3            white

Box of 6            white

Box of 72          white

## FLIP

More than just a training ball! JOOLA Flip, also seamless, is the ideal ball for club and youth training because of its playing features and excellent quality.

Box of 72            white

## PLASTIC BALL - WITH SEAM -

## SUPER-P

First generation of plastic balls (traditionally manufactured with seam) has become well established in the market. Playability is similar to that of celluloid balls. High-quality, optimum roundness, balanced hardness, good price-performance ratio - ideal for club requirements.

---

Box of 3	white
Box of 6	white
Box of 72	white

## PRACTICE-P

Practise balls made from (high quality) plastic. Ideal for all aspects of club training. Proven JOOLA quality with a great value for money.

---

Box of 72	white

# ZELLULOID

## SUPER \*\*\* 40

The classic among competition balls. The quality has been proved a million times. Durability and extreme resilience have made this ball one of the most played ITTF balls. On top of this, excellent ratio of price and performance makes it the ideal club ball.

- Box of 3            white
- Box of 72         white

## MAGIC

Quality training ball with an exceptional ratio of price and quality. Ideal for young players or multi-ball training in your club.

- Box of 100        white/orange
- 120er Ball-Bag   white
- 144er Ball-Box   white/orange

## TRAINING

Training balls. High quality at a reasonable price.

- Box of 120        white/orange
- 144er Ball-Box   white/orange

## FAN

Coloured balls bearing players motifs.

- Pack of 9

## SPINBALL

High quality training and leisure ball in the ball design of the future. Ideal training aid also for beginners, due to „visible“ spin.

- Pack of 12

## MULTISIZE SET

8 balls in different sizes from 27-55 mm.

- Pack of 8

## BALLBOX

Ball box with lid for the safe storage of 15 table tennis balls.

## BALLBOX HOLDER

Ball box holder with lockable plastic container for at least 160 table tennis balls. Solid construction at very low weight. Ideal for modern multi ball training. Set up or dismantled in 2 minutes. A must have for every coach.

## BALL COLLECTOR

Handy „Ball-Collector“ with a practical telescopic pole which makes collecting the balls after each training session a lot easier. Foldable upper part, therefore very little storage space required. Collection net opening: 40 cm, Total length: 2 m

# SPORTS- WEAR

FUNCTIONALITY  
COMBINED WITH  
TOP DESIGN

Joola®

LINARES

**NEW**

## LINARES

Two-colour geometric print polo shirt in various colour combinations. Moisture absorbant material provides first-class comfort and dry skin.

Material: 100% polyester SUBLIMATION  
 Sizes: 140, 152, XXS - 5XL  
 Colors: black-red, black-green, navy-lime, blue-light blue

## MACO

Light-weight, half-long TT shorts with built-in harmonic coloured mesh fabric for even more elasticity and wearing comfort. With two side pockets, elasticated waist and drawstring for width adjustment.

Material: 100% polyester (Dimple Elastic + MICRO DRY FIT)  
 Sizes: XXS - 5XL  
 Colors: black, navy

MILAN

**NEW**

## MILAN

Polo shirt with fancy colour inserts, available for men and women. Light shirt made from high-quality breathable Microdot fabric, very comfortable, dry feel and hard wearing.

Material: 100% polyester MICRODOT  
 Sizes: 140, 152, XXS - 5XL  
 Colors: navy-red, bordeaux-pink, blue-pink, green-black

## MILAN COTTON

cotton fabric with stretch provides optimum mobility and pleasant comfort.

Material: 93% cotton / 7% lycra  
 Sizes: XS - 5XL  
 Colors: navy-red, bordeaux-pink, blue-pink, green-black

## BASIC

Classic TT shorts for universal use, 2 side pockets, elasticated waistband with string to adjust size, without integrated pants.

Material: 100% polyester MESH COOLING  
 Sizes: 140, 152, XXS - 5XL  
 Colors: black, navy, anthracite

## BASIC LONG

Longer version of the classic 'Basic' table tennis shorts suitable for universal use. Waist band cord and 2 side pockets. No inner slip.

Material: 100% polyester MESH COOLING  
 Sizes: XXS - 3XL  
 Colors: black

# LADY MILAN

**NEW**

## LADY MILAN

Feminine cut, short lady shirt with V-neck, matching men's version.

Material: 100% polyester MICRODOT  
 Sizes: XXS - XXL  
 Colors: navy-red, bordeaux-pink, blue-pink, green-black

## MARA

Skirt matches Lady Shirts MILAN, PADOVA, MATERA, CUNEO and FALK with integrated hotpants.

Material: 90% polyester / 10% Elastic  
 Sizes: XXS - XXL  
 Colors: black-white, black-green, navy-blue, navy-lime, navy-red, red-navy

**PADOVA**

**NEW**

## PADOVA

Elaborate polo shirt made from high-quality, light polyester micro Interlock fabric. The soft functional material provides maximum moisture control. Coloured inserts and dynamic line pattern emphasize the exciting design of this shirt.

Material: 100% polyester MICRO INTERLOCK  
 Sizes: 140, 152, XXS - 5XL  
 Colors: navy-red, black-green, red-navy

## MACO

Light-weight, half-long TT shorts with built-in harmonic coloured mesh fabric for even more elasticity and wearing comfort. With two side pockets, elasticated waist and drawstring for width adjustment.

Material: 100% polyester (Dimple Elastic + MICRO DRY FIT)  
 Sizes: XXS - 5XL  
 Colors: black, navy

# LADY PADOVA

## LADY PADOVA

Feminine cut, short lady shirt with V-neck, matching men's version.

Material: 100% polyester MICRO INTERLOCK  
 Sizes: XXS - XXL  
 Colors: navy-red, black-green, red-navy

## MARA

Skirt matches Lady Shirts MILAN, PADOVA, MATERA, CUNEO and FALK with integrated hotpants.

Material: 90% polyester / 10% Elastic  
 Sizes: XXS - XXL  
 Colors: black-white, black-green, navy-blue,  
 navy-lime, navy-red, red-navy

LUCCA

**NEW**

## LUCCA

Polo shirt in neutral colours for table tennis and leisure, subtle colour contrasts on collar and sleeves. The shirt is light, hard wearing and comfortable representing great value for money.

Material: 100% polyester MICRODOT

# SHOES

**NEW**  
**VIVID**

**Stability, flexibility and grip.**

Control the game with a table tennis shoe that gives you an outstanding playing feel. The new JOOLA VIVID has been adjusted to the specific requirements of table tennis with an attractive design and a choice of subtle colours.

- very lightweight and high-quality table tennis shoe
- ergonomic inner sole provide top comfort and support
- breathable mesh fabric inserts at front and sides
- extremely flexible and non-slip sole
- available in two colours

Colors: petrol-lime      Sizes: 36 - 46  
light blue-pink      Sizes: 36 - 43

## B-SWIFT

An absolute highlight among table tennis shoes. The modern and yet functional design is specifically tailored to the demands of top performance table tennis. The newly designed sole with incorporated, extremely soft speed absorbing components, perfectly transform even the fastest changes in movement and therefore help to implement the sensed playing situation to footwork. The JOOLA top players Chen Weixing and Daniel Habesohn (European Champions doubles 2012) use this shoe.

Sizes: 36 - 45  
Color: white-red

## ATOLL

Specially designed for the requirements of elite table tennis, the high quality made JOOLA ATOLL is the ideal shoe for players with the highest demands. The breathable mesh fabric, as well as the extra soft, ergonomic inner sole provide a comfortable fit. The specifically for table tennis requirements developed MD/rubber sole convinces with good grip and enables an excellent sense of balance. The JOOLA ATOLL offers the best credentials for that, what good footwork in table tennis distinguishes: a stable stance and quick changes in direction!

Sizes: 36 - 46  
Color: white-blue

## RALLY

The top shoe from JOOLA for players of the highest standard. The uppers are made from breathable mesh and functional micro fibre which guarantees excellent breathability and comfort. In the sole the proven phylon material is used, making it very light and slip-resistant. The legendary EVA inner sole in combination with the new supination support prevents the foot from deviating outwards. The RALLY has been developed for the ambitious player demanding an extremely lightweight, non-slip and flexible table tennis shoe that also reduces heavy strain on the joints.

Size: 35 - 47  
Color: white-blue

## TOUCH

The classic among table tennis shoes, Touch has been upgraded with a new appealing design. The sole, manufactured in the same way for many years, provides exceptional grip. The upper material has now been revised and the seams and design have been improved. Therefore, TOUCH is still the model for all leisure and club players.

Size: 36 - 46  
Color: white-blue-red

## COURT

Joola COURT meets all requirements of modern table tennis. It is extremely lightweight and the flexible, grippy sole offers best support for all table tennis movements, e.g. a fast lunge or side steps. The soft inner sole supports the foot and the comfortable fit of the Joola COURT also provides high wearing comfort. A table tennis shoe for everybody at an attractive price.

Size: 36 - 46  
Color: white-blue

## PRO JUNIOR

The new PRO JUNIOR - a shoe specially designed for children, now featuring a new design with practical velcro fastenings! The PRO JUNIOR has a non-slip sole that has been established for years. The EVA mid-sole protects children's joints from too much strain during the growth period. The extremely light shoe enables sudden direction changes and supports the natural movements of table tennis.

Sizes: 30 - 36  
Color: white-blue

## COMPACT

Spacious sports bag with main and side compartments.

Dimensions: 68 x 38 x 30 cm  
 Colors: black-brown, navy-green

## TOUREX

blue

## CITY

- table made of an acrylic resin/silica sand mixture
- playing surface coated with a layer of acrylic resin, thus very even and free of pores, providing proper playing conditions
- absolute weatherproof – proven against frost, heat, UV radiation and temperature fluctuations
- undercarriage made of solid rectangle tube 50/40 mm, hot-dip galvanised, dismantlable
- assembled by two people without any problems, despite a total weight of 293 kg (the heaviest part only weighs 78 kg)
- because of its very solid construction ideal for public places, schoolyards, camping grounds
- foundations are not necessary, only level ground
- corresponds with EN 14468-1 C

blue

## EXTERNA

- table made of fibre-glass reinforced polyester
- very even surface for perfect playing conditions
- absolute weatherproof – proven against frost, heat, UV radiation and temperature fluctuations
- solid undercarriage made of substantial rectangle tube, hot-dip galvanised
- easy assembly of legs
- due to its very solid construction, ideal for public areas, school playgrounds, camping sites
- foundations are not necessary, only level ground
- weight 128 kg
- corresponds with EN 14468-1 C

blue

## EXTERNA GB

- table made of fibre-glass reinforced polyester
- very even surface for perfect playing conditions, absolute weatherproof – proven against frost, heat, UV radiation and temperature fluctuations
- solid undercarriage made of substantial rectangle tube
- easy assembly of legs
- due to its very solid construction, ideal for public areas, school playgrounds, camping sites
- foundations are not necessary, only level ground
- corresponds with EN 14468-1 D
- weight 117 kg
- Net and post set not included.

blue

## LIBRE NEW

- weatherproof plastic net in a practical bag
- leading model with adjustable height and clamping technique
- adjustable net tension
- favourable price
- corresponds with EN 14468-2 B

## OUTDOOR

- favourable priced, weatherproof plastic net and post set in bag
- adjustable net tension
- corresponds with EN 14468-2 C

## EXTERNA/CITY

- suitable for table EXTERNA and CITY
- very stable full metal construction, weatherproof
- very substantial and difficult to maliciously remove from the table

## TT-BUDDY V300

The BUDDY V300 is set up and ready to use in seconds. The ball frequency can be adjusted from 20 to 70. Backspin, topspin and oscillation speed are all adjustable.

- fast setup with no tools or extra equipment necessary
- variable frequencies: from 20 balls/min - 70 balls/min
- variable adjustment of backspin and topspin (each with levels 1 to 5)
- built-in oscillator to play from different table positions
- adjustable oscillation speed and ball frequency
- easy & simple controls
- light weight (approx. 1.1 kg)
- easy storage (Dimensions: 48 x 28 x 28 cm)

## TT-BUDDY V200

The TT-BUDDY V200 is a full-value robot in an innovative and modern design. It plays chop, topspin or heavy topspin balls and holds up to 100 balls. Due to its size and easy operation it is the perfect training buddy, suitable for home and leisure use.

- fast setup with no tools or extra equipment necessary
- variable frequencies: from 12 balls/min - 70 balls/min
- 3 different spins: backspin, topspin, heavy topspin
- easy and simple controls
- with remote control
- light weight (approx. 1.1 kg)
- Easy storage (Dimensions: 48 x 28 x 28 cm)

## TT-BUDDY V100

The TT-BUDDY V100 is the ideal training partner for beginners. The ball frequency can be easily programmed with the remote control. Emits topspin balls, the ball compartment holds 100 balls. Battery operation (6AA batteries not included).

## A/C ADAPTER

Suitable for use with all Buddy robot models.

## ROBOT SHORTY

The multifunctional table robot JOOLA ROBOT SHORTY is very easy to operate. Variable speed, 8 different rotation modes, different trajectories and oscillation provide a variety of training and application. Collecting net, remote control, large ball container and very easy installation and dismounting make the JOOLA ROBOT SHORTY an indispensable device for all training needs. Including collection net.

## NET TT-BUDDY

Economically priced, practical ball collection net for the TT-BUDDY. Easy and fast assembly, fits on the table with nets on the sides. The collected balls fall into a container or bucket (not included) through an opening, making it simple to refill the tt buddy ball container.

## SERVICE PRACTICE NET

The JOOLA catch-net - no more annoying collecting of the balls. Compact to store and easy to use are the essential characteristics of the new JOOLA catch-net. The practical folding mechanism, the good finish, the clever rolling system and the easy handling make the catch-net an essential helper, especially when practising serves or doing bucket-ball.

## STANDARD

Practical plastic construction. Space-saving practical design to protect against damage.

With additional pockets for "TIME-OUT" and "HOME/GUEST" display. Numbers 0-30.

## POINTER

Robust, durable manufacture, easy to handle, simple to set up and take down with an attractive design.

JOOLA SCORER POINTER is ideal for club use, as even when intensively used the plastic parts won't pull out. Includes time out cards.

## RESULT

Compact, foldable, very durable plastic scorer with numbers from 0-30 (points) and 0-5 (sets). Cards made of sturdy, non-tear PVC. The solid ring mechanism provides easy flipping.

**NEW**

## PICCOLO

Foldable mini plastic score board with PVC numbers 0-20 (points) and 0-5 (sets). Very space-saving and resistant against damage due to its massive construction. The double spiral prevents breaking of the numbers and provides for very easy back and forth flipping. Can be stored in the supplied box.

**Dimensions:**

width=23.7 cm, height=14 cm

## SCORER BOARD

New practical score board for club use. The JOOLA TEAM SCORE BOARD can be used upright or suspended. The score board can be individually fixed by means of practical hook-and-loop fasteners and is therefore ideally suited for any club hall.

## UMPIRES TABLE WITH INBUILT TOWEL BOXES

With the top new JOOLA umpires table with 2 inbuilt towel boxes you professionally present your court in club sports.

The lightweight umpires table can easily be carried by one person and is set up in a few seconds. Unlike conventional tables made of cardboard the solid quality of the umpires table ensures long-term usability.

## UMPIRE TABLE

Matching the JOOLA scorer. Elaborate folding construction, no loose parts, with a carrying handle for easy transport. Chosen for many international events and suitable for club use.

L 76 cm, H 69 cm, D 34 cm.

## TOWEL BOX

Practical, low-priced and stable towel box. Suitable for multi use.

## SURROUND

**Neutral:**

green/blue 2,00 m  
green/blue 2,33 m

**JOOLA:**

green/blue 2,00 m  
green/blue 2,33 m

## SURROUND

90 cm high sturdy surround. Very robust and compact. Ideal for daily use in clubs. The height and design of the net means that it will catch most shots so that the flow of play is not disturbed.

blue 2,00 m

## SURROUND TRANSPORTER

Robust 40/40 mm steel tube construction. 4 wheels with brakes.

All parts zinc coated. The special position of the hanging bars allows for the surrounds to be hung directly on to the transporter. 4 sets of hangers with a maximum of 14 surrounds on each.

**Dimensions:**

- Transporter for 2.00 m surrounds: L 2300 mm / W 720 mm / H 1700 mm  
- Transporter for 2.33 m surrounds: L 2360 mm / W 720 mm / H 1700 mm

Advertising on surrounds - excerpt from the ITTF regulations:

- Lettering or symbols on the inside of surrounds shall not include white or orange nor more than two colours and shall be contained within a height of 40 cm;
- it is recommended that they be in a slightly darker or slightly lighter shade of the background colour.

**NOT  
WEATHERPROOF**

**WEATHERPROFF**

## OUTDOOR BALL

40mm table tennis ball for outdoor use. 41% heavier, therefore optimal features to play outside; also when it's windy.

Tube of 3

Carton of 6

## LINUS

A plastik racket made to fit the requirements of an outdoor racket. With a high level of control, the special surface structure also allows spin development, so that slightly spinny topspin and push balls are possible. Racket is robust and ergonomically formed.

**Linus Bat:** red, blue

**Linus Set:** 2 bats

## ALLWEATHER

JOOLA ALLWEATHER – ideal bat for leisure table tennis. Weatherproof, extremely robust, anatomically formed and non-slip handle, easy to play with due to special rubber structure.

**Allweather Bat:** red, yellow

**Allweather Set:** 2 rackets in practical storage box

## TT-SET MULTICOLOR

Four weatherproof rackets, easy playable and in four different colours. Ideal for children's birthday parties, visits to the swimming baths and barbecues. A highlight at every party.

set of 4

## SELECTED TABLE TENNIS BATS FROM THE LARGE JOOLA RANGE IDEAL FOR BEGINNERS AND AMATEUR PLAYERS

**NEW**

### ERGONOMIC

**5-ply glued cottonwood plywood, 1.8 mm Smash rubbers**  
High quality allround competition bat with ergonomic handle for better flexibility and improved power transmission from the lower arm. Increased wrist flexibility facilitates spin loaded shots that exasperate opponents. The innovative JOOLA Ergonomic handle also improves touch and sensation, therefore improving responsiveness in all playing situations. The excellent playing features of the 5-ply Ergonomic blade are completed by the extremely grippy ITTF approved 1.8mm JOOLA Smash rubbers.

**NEW**

### ERGONOMIC PRO

**5-ply glued cottonwood plywood, 1.9 - 2.1 mm Axxeess rubbers**  
The JOOLA Ergonomic Pro is an innovative offensive competition bat with ergonomic handle and highest quality JOOLA AXXEESS rubbers. The ergonomic handle adapts to the natural stance of the hand and therefore improves the flexibility of the wrist and the power transmission from the lower arm. In critical playing situations this can produce a variety of stroke combinations. The combination of the blade with the made in Germany top rubber JOOLA AXXEESS, creates a truly offensive competition bat to take your game to the limit. The extremely grippy and elastic upper rubber is perfect for offensive looping shots, while the 37.5° soft sponge of the JOOLA AXXEESS intensifies the feel.  
Exceed your limitations and play like a pro!

## ROSSKOPF CLASSIC

High-quality allround competition blade fitted with JOOLA 4 YOU 2,0 mm (ITTF) rubbers for controlled, modern allround play. With key ring. Weight 158g

## ROSSKOPF AUTOGRAPH

Competition blade fitted with 2.0 mm JOOLA 4ALL rubbers (ITTF). Excellent playing features for ambitious players. With original autograph and key ring. Weight 160g

## ROSSKOPF GX 75
